

REPAIR & SYSTEM TEST CAPABILITY

ALLEN BRADLEY 1394 MODULAR AC SERVO SYSTEM

Technical Bulletin

This is the Allen Bradley 1394 modular AC servo system. K+S Services Kokomo facility now has the capability to provide full service repair for these servo systems. Whether it's the 1394 stand alone analog interface or the 1394 GMC servo system that utilizes the Allen Bradley "GML" programming language, K+S can support the customers repair service needs. This system incorporates and will also test the AB AM03, AM04, AM07, AM50 & AM75 servo amp modules. Utilizing four servo drive test modules, this system will provide a full communications test throughout the entire drive system. Additional diagnostic and special interface fixtures, such as the AB Flex I/O system, provides communications diagnostics on the 1394 controllers peripheral ports. This 1394 servo system can be cycled with one to four axis at a time to simulate a wide range of real world applications!

12 Month In-Service Warranty

All Units Are System Tested

No Charge Evaluation
